

GLASS CLEANER PRODUCT DATA SHEET

OVERVIEW

DryWired® Glass Cleaner is a water-based cleaner for glass that utilizes aluminum oxide to create a clean surface to promote adhesion. The hydrophilic property that is present after cleaning indicates the glass is free of oils and other contaminants, ready for a nanocoating to be applied to the surface. This glass cleaner not only degreases, but also slightly abrades the surface, allowing for any light surface stains or watermarks to be removed. Recommended to use for surface preparation before application of DryWired Glass & Ceramics, DryWired Microporous and the Perma-Clean Line of products. Can also be used alone as a glass cleaner.

USES

- ▶ Windows
- ▶ Windshields
- ▶ Mirrors
- ▶ Shower doors
- ▶ Countertops

FEATURES

- ▶ Water-based
- ▶ Non-toxic
- ▶ Removes light surface staining

APPLICATION AND STORAGE

Application: Shake before use. Pour cleaning solution onto a buffing pad or microfiber cloth. Using a pump spray bottle, mist water onto the glass in multiple areas and apply cleaner in circular motions (see Fig.1). Use water and clean towels to remove excess glass cleaner (see Fig. 2).

All statements, technical information and recommendations contained in this document are based upon tests or experience that DryWired believes are reliable. However, many factors beyond DryWired's control can affect the use and performance of a DryWired product in a particular application, including the conditions under which the product is stored or used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the DryWired product to determine whether it is fit for a particular purpose and suitable for the user's method of application. No warranty or condition, expressed or implied, is given regarding the accuracy of the statements, technical information or recommendations contained in this document. Except to the extent prohibited by law, DryWired will not be liable for any losses or damages arising in any way from the DryWired product including, without limitation, any direct, indirect, special, incidental or consequential damages, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.

APPLICATION AND STORAGE

Verification: Once glass cleaner has been completely removed from the surface, spray water on the surface to identify a hydrophilic surface. If the water spreads out across the surface, the surface has been cleaned thoroughly and is ready to be coated. If the water beads up on the surface, reapply glass cleaner and verify again by water spray test (see Fig. 3).

Storage: 1-year shelf life stored in a tightly sealed container out of sunlight in a dry place. Do not allow product to freeze.

Consumption: 32 oz/2,450 ft² [225m²] , 8 oz/560ft² [50m²]
